Clear vision view finder made of high grade optical glass.

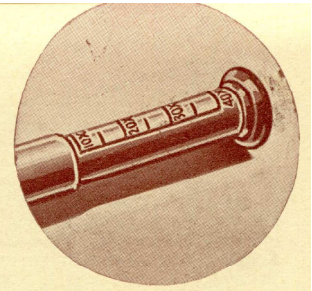

C787.....EACH **\$6**

# VARISCOPE Variable Selective Power

## The New All Purpose Telescope

American Made — Precision Quality — Advanced Design

*Use the Variscope anywhere at any time*

A variety of telescopes all combined in one. Changes from one power to another are made instantly and the desired power can be selected by merely setting the marked tube. All of this attained without the use of extra attachments. It is a law of Physics that as the power or magnification is increased the distinctness decreases and the field of view becomes smaller. If this were not the case, only higher powered telescopes would be used. When atmospheric conditions are favorable such as a bright clear day, the higher powers are excellent for observation, but if atmospheric conditions are such that it will not permit the use of higher powers satisfactorily, the lower powers are instantly available.

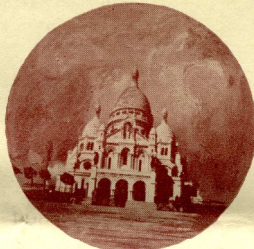

The various powers are plainly marked on the power tube for quick setting. Higher powers for long range and greater magnification, lower powers for a wider field of vision and brighter lighting. For sporting events and moving objects lower powers are recommended, while medium powers are best for target spotting, hunting and marine use.

### Precision Quality

Each instrument is made to the most exacting specifications. With the large achromatic objective lenses the field of view of each power is large with good illumination. Sharp and bright images are the result of fine precision ground lenses produced by an American factory.

No compromise with quality is tolerated in obtaining these durably constructed instruments. Tubes are of heavy brass and the fittings beautifully finished in a wear-proof, tarnish-proof chromium plate. New designed bushings permit the drawtubes to slide smoothly, firmly and accurately. All are sold complete in a sturdy leather case.

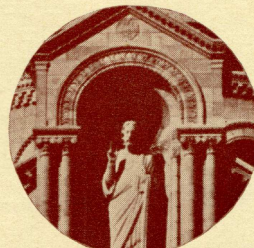

Examine any of these scopes in perfect confidence.

No. M135.....EACH \$4.25

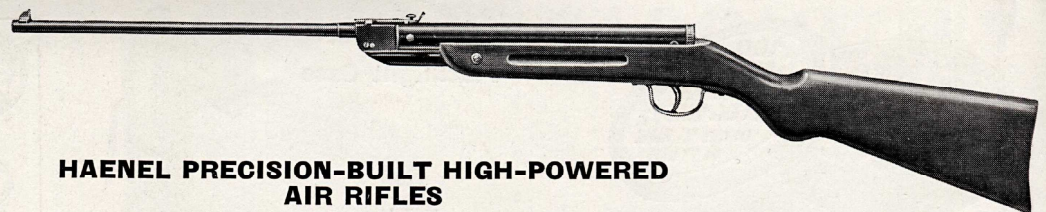

NO PUMPING is required of any Haenel Air Pistol or Air Rifle. The patented Haenel valve construction requires only one movement to give a gun its tremendous power. This power is of constant evenness.

NO POWDER is required in using a Haenel gun. The senior models are ideal for target and small game shooting without the use of powder ammunition. Ammunition costs are reduced to a minimum, since pellets cost considerably less than cartridges, and darts can be used many times over.

Other advantages are: Can be used indoors; do not soil in use; and practically noiseless operation.

**GUARANTEE**—Each Haenel Air Gun must pass a rigid examination before leaving the plant, and is adjusted, tested and shot by experienced marksmen on the shooting range of the works. Each gun is guaranteed for the workmanship and materials and for the service for which it is intended. Extra parts are available at a nominal charge.

**HAENEL PRECISION-BUILT HIGH-POWERED AIR RIFLES**

Finest precision construction. Particularly adaptable for target shooting because of their extreme accuracy. Will kill small game. HAENEL air rifles made to last a life-time.
