Foreword

We take pleasure in presenting our 1938 Catalog. This new issue shows an increase in our lines by more than one third, and is a result of our careful study and close cooperation with progressive dealers. Every item is a live item, vital to both the consumer and to the distributor.

The new numbers listed represent entirely new items or improved designs with new features of decided merit and performance. They are offered in a great variety of patterns and a price spread that covers every requirement in this field. In a few instances the new additions so completely eclipse older items that it has seemed wise to discontinue the latter. The interesting additions make it more than ever the most outstanding variety in the field. It is the logical line for the progressive dealer to concentrate on.

We are confident that the trade is heartily in accord with our policy of continually increasing the salability and appeal of our merchandise, by adding new items and improving others to satisfy every legitimate requirement.

We feel we now offer a complete line in every sense of the word and one which the trade can feature to advantage. Today, more than ever before, the listed items are deserving of your careful consideration.

We take this opportunity to express our appreciation for your loyal support in the past.

IMPORTANT INFORMATION

CATALOG NUMBERS—This catalog shows every active item that we now offer and cancels all previous issues. All old catalogs should be destroyed. Always give catalog number and name of each article, and on certain numbers where sizes occur please state size.

SHIPPING INSTRUCTIONS—In ordering please be sure to give full and explicit directions for shipment and they will be carefully followed. If no shipping instructions are given we will use our best judgment in forwarding shipments. All goods are at the risk of the purchaser after delivery in good order to the carrier. All claims for loss or damage sustained in transit should be promptly made against the transportation company. We will use our best efforts in the interest of the purchaser in locating lost shipments and correcting damages.

WARRANTY—Every item listed in this catalog is guaranteed to be as represented and is warranted free from imperfections and defects in manufacture or workmanship. Should such defects appear we will, at our option, cheerfully repair or replace the item without charge. Under no circumstances, however, can we assume the responsibility for breakage where flaws do not appear, nor will we replace merchandise which has suffered from abusive treatment. No dealer is authorized to make replacements for us. Articles claimed defective must be returned, charges prepaid, for inspection direct to us.

CHARGE ACCOUNTS—We are pleased to extend credit terms to responsible dealers listed and satisfactorily rated with mercantile agencies. To facilitate the establishment of credit terms promptly, please submit with your initial order trade references indicating manufacturers and jobbers with whom you are doing business, together with bank affiliations.

TERMS—Our regular terms are 2% cash discount for payment within ten days or net thirty days. All shipments are subject to f.o.b. New York City terms. C.O.D. orders must be accompanied with a deposit of 25% of the order to insure prompt shipment.

PRICES—All prices shown in price book are net; excise, sales, manufacturers and importers taxes have been included. Due to the fluctuations in foreign exchange our prices are subject to change without notice. If price changes occur before revised price lists are issued we will always endeavor to price orders with the lowest prevailing prices at the time of receipt of order.

WIDE ANGLE MARINE BINOCULARS

Two new models designed to meet the most rigid naval specifications. Because of the tremendous illumination, remarkable field of view and penetrating power, these new models are becoming the most widely used marine glasses. The exceptional light gathering capacity of these glasses permits the use of them at night. Sturdy moisture tight construction, optical excellence and mechanical dependability are combined to make these outstanding glasses. The bodies of strong aluminum alloy are covered with waterproofed leather. The eyecups of hard rubber are formed to fit the brow. The scaled adjustment on right ocular and center fold scale together with the center focusing screw permits almost instantaneous adjustment. Complete in velvet lined sturdy carrying case of sole leather with carrying and neck straps.

8 X 30 FEATHERWEIGHT

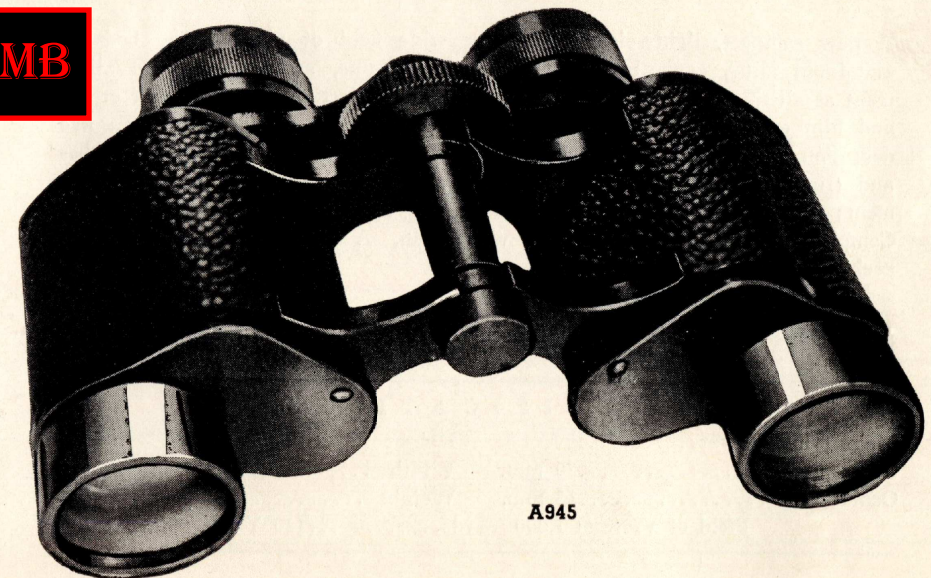

"THE FEATHERWEIGHT" was designed to meet the popular demand for a high powered lightweight binocular. Constructed of special lightweight aluminum alloy, these glasses are as rigid as steel, though weighing only 12 oz. The superb workmanship, combined with perfectly matched lenses, and a beautiful appearance make "THE FEATHERWEIGHT" a remarkable value. The optics are made of the finest raw optical glass, and have been ground and polished by Europe's greatest craftsmen.

Complete with fine quality leather case and shoulder strap.

ASTRONOMICAL - TERRESTRIAL TELESCOPES

ACHROMATIC telescope with interchangeable 50X Power Celestial and 25X Power Terrestrial eye-pieces. For astronomical observation the 50X eye-piece is used without the extension tube and shows an *INVERTED IMAGE* magnified 50 times. The 25X eye-piece is used with the extension tube, which has in it a series of fine lenses for terrestrial observation. The high quality optics in this telescope, including *ACHROMATIC* objective lens, brings distant objects into sharp relief without distortion.

SPECIFICATIONS—19" closed, without extension tube. 29½" extended with tube. Achromatic objective lens 1½" diameter. Chromium plated brass body and tube, body covered with black morocco grain leather. Easy draw tube. Perfect alignment.

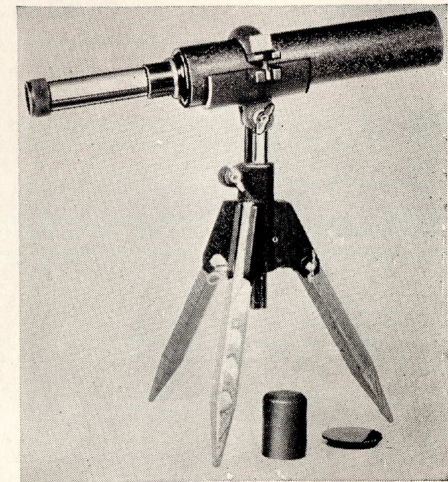

Best results obtained from this telescope with a tripod and mount. Listings on page 16 are recommended.

- No. A692. List Each 10.00

PORTABLE SPOTTING SCOPE

A medium priced instrument of precision manufacture at half the usual selling price.

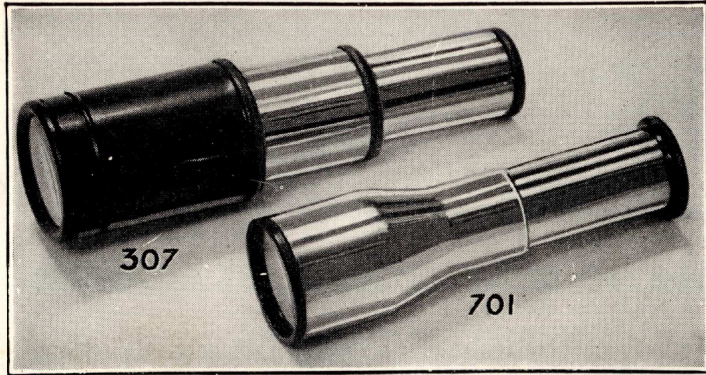

Exceptionally bright field of view makes it ideal for every observation. Especially designed for use by shooting clubs on all indoor and outdoor ranges. Highly corrected precision ground 1¾" objective. Field of view at 100 yards is 7½ feet. Smooth operation in all kinds of weather. Major adjustments accomplished quickly by moving the draw tube in a straight line; micro-sharp focus obtained by rotation of draw tube. Though sturdily constructed it weighs only 36 oz. Length, Closed 12". Open 17". Chrome tube, black crystalline body with black leather case and shoulder strap.
