THE

Inside Story

ON

Zephyr-Light

BINOCULARS

Bausch & Lomb Zephyr-Light models offer you new advantages that will bring even greater enjoyment, improved performance, from *the world's finest binocular*.

Every Zephyr-Light binocular is as compact, lightweight, and easy to handle as is possible without reducing optical quality. The body is made of a light, high tensile strength magnesium alloy. Optical parts have been reduced to minimum weight consistent with efficient performance. Nearly 40% of the total weight of the Zephyr-Light Binocular is included in the

optical system—the lenses and prisms. You are assured of the high-quality optical performance which has always distinguished Bausch & Lomb binoculars—generous field of view, bright image, superior resolving power and image definition, reduction of the seven types of aberrations, maintenance of alignment.

All air-to-glass surfaces are specially treated with Balcote anti-reflection coating. This treatment cuts light loss by as much as 50% . . . reduces internal reflection causing flare . . . gives clearer, sharper binocular vision.

Bakelite eyepiece caps retain their smooth black appearance and are comfortable in cold weather.

Plastic finish over body (morocco grain), weather-proof, wear-proof, attractive, furnishes a good grip. Cannot peel off.

Strap eyelets cast integral with body.

Front is integral with body — eliminates one end cover — strong and weather-tight.

Precision hinge and diamond-turned axle maintain alignment.

Individual focusing or central focusing eye-pieces are obtainable.

Nine ultra-precise optical units, made from six kinds of B&L glass, are required in each side of the model illustrated.

All air-glass surfaces are Balcote anti-reflection coated, for increased light transmission and greatly improved image contrast.

Prisms are securely held in position.

Strong, light, one-piece magnesium body.

Large objectives collect maximum light . . . are of extreme value in dark weather and twilight.

"WHICH BINOCULAR MODEL SHALL I CHOOSE?" That depends on the principal use to which you plan to put it. No one Binocular offers highest power, widest field, maximum relative brightness, minimum size and weight.*

For general use, 6 and 7 power glasses are usually preferred, because they can easily be held steady, are conveniently handled and carried, offer high image brightness. For extreme long range use, glasses of 8 and 9 power are recommended.

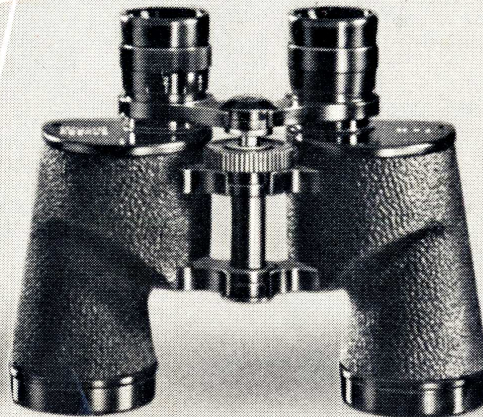

**However, all Zephyr-Light models offer new lightness, new ease of handling, because of their reduced weight.*

BAUSCH & LOMB

Zephyr-Light

BINOCULARS

MB

6X,30 Zephyr-Light. Extremely light weight, compact size, wide field, bright image. Excellent for viewing fast action—at the race track, for football and other spectator sports, hunting, nature study, private flying. Balcote anti-reflection treated.

61-21-11 Bausch & Lomb Binocular 6x,30, central focusing, in leather case with straps. List price, \$135.00, plus 20% tax.

7X,35 Zephyr-Light. Most popular Bausch & Lomb binocular model for all-around use. Power is high enough for well-enlarged view, yet binocular is compact enough to be easily held steady; perfect balance. Balcote anti-reflection treated.

61-21-21 Bausch & Lomb Binocular 7x,35, central focusing, in leather case with straps. List price, \$140.00, plus 20% tax.

7X,50 *Not Zephyr-Light*. Navy model, for navigation and use wherever image brightness is more important than light weight and compactness. Highest relative brightness of any binocular—a true "night glass." Water-proof, fog-proof, fungus-proof construction. Balcote anti-reflection treated.

61-21-58-05 Bausch & Lomb Binocular 7x,50, individual focusing in case with straps. List price, \$162.00, plus 20% tax.

MB

8X,30 Zephyr-Light. Compact, with wide field of view but less brightness of image. Widely used by big game hunters, travelers, mountain climbers, and those who require higher power and easy portability. Balcote anti-reflection treated.

61-21-31 Bausch & Lomb Binocular, 8x,30, central focusing, in leather case with straps. List price, \$150.00, plus 20% tax.

9X,35 Zephyr-Light. Highest power glass recommended for hand-held use. Especially designed for use where distances are great and where clearness of atmosphere permits use of a powerful binocular. Balcote anti-reflection treated.

61-21-41 Bausch & Lomb Binocular, 9x,35, central focusing, in leather case with straps. List price, \$155.00, plus 20% tax.
