BEST OPTICAL VALUES

MB

This is a list of the world's best optical values. Compare these instruments with others and you will understand why Brownscope has maintained leadership in the optical field for many years. Our success rests on our policy of giving our customers the most for their money — superior instruments at lower prices. Look over the items shown in this booklet, and remember — unlike most things there is no cost of upkeep of optical instruments.

Microscopes reveal the fascinating wonders of the invisible world existing all around us. Binoculars and telescopes bring distant objects close, and also reveal the awe-inspiring wonders of the heavens.

Astronomy and microscopy are the most fascinating of hobbies. The telescope and microscope transport you to strange lands full of amazing sights. The boundaries are limitless and the pathways full of adventure. You need no expensive ticket or heavy baggage for your journey. All you need is a Brownscope.

Brownscope 60 Power Telescope

**MOST POWERFUL MADE FOR ANYWHERE
NEAR THE MONEY. Now you can own a genuine**

HIGH POWERED TELESCOPE

Only \$2.95 for this amazing telescope guaranteed to bring distant objects, people, moon, stars, ships, sports events, etc., 60 times as close

\$2.⁹⁵

*Three
Telescopes
and a Microscope
combined in one instrument*

Has the new variable eyepiece giving three different powers: 20X—40X—60X. The 20 power setting is for ultra-bright images while the 40 and 60 power settings are for extra long range 5 sections. Approx. 3 ft. long. Closes to less than 1 ft. Has 4 powerful ground and polished lenses. When collapsed it makes a *powerful compound microscope* adjustable to 3 different magnifications. See the wonders of the world. Complete directions included. Kraft Fiber tubes, brass bound.

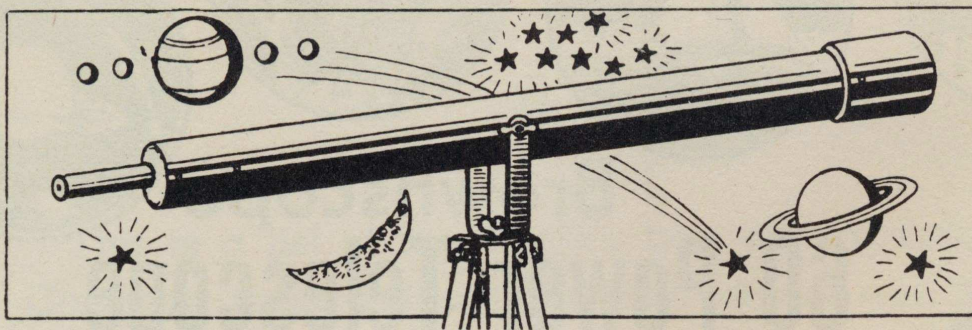

Special Price **\$2.⁹⁵**

FEATHER WEIGHT 8-Power Prism Binocular

MB

8x32

LONG RANGE BINOCULAR

Designed to meet the popular demand for a high powered light-weight binocular. Constructed of special lightweight aluminum alloy, these glasses are as rigid as steel, though weighing only 16 oz. The superb workmanship, combined with perfectly matched lenses, and a beautiful appearance make it a remarkable value. These binoculars have achromatic eyepiece lenses as well as achromatic objective lenses, a feature found only in the most expensive binoculars. This fine glass is unexcelled for hunting, sports, marine use, and long range work.

Try this glass at no risk. Your money will be promptly refunded if you are not perfectly satisfied in 5 days' trial. We are confident that once you have used this unusually fine glass you will never want to part with it.

BROWNSCOPE TELESCOPES

Achromatic Spotting and Observation Telescope

NOW AVAILABLE...
10-40 VARIABLE POWER
TELESCOPE!

40 POWER

FOR the first time since the war you can own this amazing 10 to 40 variable power telescope. The very same one that is famous with astronomers, ship captains, big game hunters and sportsmen.

It is not a toy, but a precision instrument scientifically made by skilled optical craftsmen. The mirror-polished lenses make distant details clear, sharp and very easy to see. It has a fully achromatic objective lens and an extra large ocular adjustable to the following variable powers:

- 10X—for nearby objects at wide angle.
- 20X—for target spotting scope.
- 30X—for long distance terrestrial view.
- 40X—for celestial and astronomical observation.

All complete in one telescope!

Truly a sturdy instrument that will give you a lifetime of accurate and dependable service.

TAKE this telescope along on a hike or sail . . . take it with you to the races, the fights and ball games . . . get loads of fun studying the stars and spotting planes. Order yours today!

DIMENSIONS

OBJECTIVE lens is 53 millimeters in diameter . . . the unusually large objective permits extra light transmission to give more definition and detail.

Overall length collapsed is 9½".

Overall length when extended in four adjustable sections is 27½".

Is covered with genuine leather and has baked-on enamel trim that will not chip.

Weighs 28½ ounces.

Long Range Achromatic

ONLY . . . \$34.50

USED INSTRUMENT DEPARTMENT

We buy, sell, and repair used optical instruments. Write us and join our long list of satisfied customers. No charge for appraisals, estimates, or price lists.

A FEW BROWNSCOPE "FIRSTS"

1932—Introduced and popularized high-powered, low-priced telescopes.

1934—Furnished an impetus to amateur microscopy by producing high-powered microscopes priced within the reach of all.

1936—Created many new amateur astronomers by supplying sets of completely finished lenses ready for mounting as astronomical telescopes.

1937—Originated a line of variable-power telescopes which provided the user with a wide variety of magnifications and fields of view in a single instrument.

1942 to 1945—Converted 100% to winning the war. During this period 21 new military instruments were invented for, and assigned to, the U.S. Army without charge.

1946—Resumed serving the public with the world's best optical values.

BROWNSCOPE BINOCULARS

SUPER POWER BINOCULARS MOST POWERFUL AVAILABLE

20 x 52

\$135

Note: If you do not have a steady hand you may find it advisable to rest the instrument against a convenient support for satisfactory performance. Because of the tremendous magnification tremors or shakiness of the hand are more noticeable than in low power instruments.

These giant 20 power prism binoculars are used when ordinary binoculars and telescopes are inadequate. Because of the extreme magnification they can be used for long range ground observation, target spotting, and astronomy. The high quality achromatic lenses bring all objects 20 times as close with unusual clarity. The 52mm objective lenses assure high light transmission. The wide angle eyepieces provide 8% wider angle than standard U.S. Government binoculars. Center wheel adjustment for easy focussing with right eyepiece also adjustable for individual compensation. Focusses any distance from 75 feet to infinity. Rugged construction yet weighs only 1 pound 14 ounces. Height 9 inches. Fine quality leather carrying case and straps included. Price only \$135 plus 20% Federal tax. Immediate delivery. We pay the shipping charges.

BATTERY COMMANDER'S TELESCOPE

POST PAID

This is the famous Battery Commander's Periscope-Telescope, having a magnification of 6 times and a field of view considerably larger than ordinary telescopes. Use it instead of a binocular or telescope for general observation or long range viewing. At parades, ball games, horse races, or other sports events use it to see over the heads of the crowd as well as bringing the players fully 6 times as close. This precision instrument is worth approximately \$150.00, and you now have the opportunity to buy it for less than one tenth. Only a limited number is available. If you are an experimenter, this instrument may easily be taken apart. All parts are threaded and may be unscrewed. Listed below are the parts you will have if you take the instrument apart.

Achromatic objective lens.

Achromatic erecting lenses.

Collective lens.

Kellner eyepiece in focussing mount.

(This is a wide angle eyepiece, achromatic, about $1\frac{1}{4}$ " focal length.

Two large 90 degree precision prisms.

Threaded mountings for above lenses and prisms.

Brass tubing and fittings.

Aluminum forked mount for the instrument.

(This is an extra attachment, not pictured, on which the entire periscope may be mounted and swiveled.) It is included without extra charge.

Price- only \$12.50, postpaid by us to anywhere in the United States. Immediate delivery.

Length $27\frac{1}{2}$ "

Weight $3\frac{1}{4}$ lbs.

TELESCOPE

with leather carrying case

\$22.50

40 mm dia. achromatic objective lenses, fluoride hard coated for brighter, clearer images.

FOR GENERAL OBSERVATION:

An ideal long range glass where high magnification is desired. Despite its high power it is only 12 1/2 inches long and weighs less than one pound. The achromatic optical system includes six precision lenses. Quick-focus spiral screw eyepiece. Constructed of hardened aluminum with black crackle finish. FOR TARGET SPOTTING: Guaranteed to spot 22 holes at 200 yards in the black and 400 yards in the white. Can be focussed as close as 15 feet. FOR ASTRONOMY: The unusually high resolving power of the needle-sharp hard-coated lenses in this precision instrument brings out the moons of Jupiter, rings of Saturn, hundreds of mountains and valleys on the moon, phases of Venus, etc., in clear-cut relief. Highly recommended by leading experts. Price, including case, only \$22.50.

Adjustable tripod (illustrated)
