

Bakelite eyepiece caps retain their smooth black appearance and are comfortable in cold weather.

Individual focusing or central focusing eye-pieces are obtainable.

All air-glass surfaces are Balcote anti-reflection coated, for increased light transmission and greatly improved image contrast.

Plastic finish over body (morocco grain), weather-proof, wear-proof, attractive, furnishes a good grip. Cannot peel off.

Prisms are securely held in position.

*Strap eyelets cast integral with body.

Strong, light, one-piece magnesium body.

Front is integral with body—eliminates one end cover—strong and weather-tight.

Precision hinge and diamond-turned axle maintain alignment.

Nine ultra-precise optical units, made from six kinds of B&L glass, are required in each side of the model illustrated.

Large objectives collect maximum light... are of extreme value in dark weather and twilight.

SPECIFICATIONS

Model	Relative Brightness	Field of View in feet at 1000 yds.	Weight (oz.)	Length open (inches)
6×,30	25	445	17	5 1/8
7×,35	25	381	20	6
7×,50	50.4	381	50	7 7/16

Only these genuine
Bausch & Lomb Binoculars are
the world's best . . . by any test

BAUSCH & LOMB

Zephyr-Light

BINOCULARS

6X,30

Extremely light, compact, wide field, bright image. Fine for viewing fast action, all spectator sports, hunting, nature study, private flying.
61-21-11 Central focusing
61-21-12 Individual focusing
In leather case, with straps
\$155.00, plus tax

7X,35

Most popular Bausch & Lomb model for all-around use. Higher power; but compact, light and perfectly balanced for holding steady while using.
61-21-21 Central focusing
61-21-22 Individual focusing
In leather case, with straps
\$155.00, plus tax

8X,30

Combines high power with compactness and ease of handling. Specially designed eyepieces give the same field of view as the Bausch & Lomb 6X,30.
61-21-31 Central focusing
61-21-32 Individual focusing
In leather case, with straps
\$170.00, plus tax

9X,35

Highest power recommended for hand-held use. Most satisfactory where distances are great and clear atmosphere permits use of a powerful glass.
61-21-41 Central focusing
61-21-42 Individual focusing
In leather case, with straps
\$170.00, plus tax

MB

7X,50

Not Zephyr-Light. Navy model, for navigation and use where image brightness is more important than light weight and compactness. Highest relative brightness of any binocular—a true "night glass." Water-proof, fog-proof, fungus-proof construction.

61-21-58-05 Individual focusing.
In pliable plastic case, with straps
\$175.00, plus tax

"WHICH MODEL SHALL I CHOOSE?"

That depends on the principal use to which you plan to put it. No one binocular offers highest power, widest field, maximum brightness, minimum size and weight.*

For general use, 6 and 7 power glasses are usually preferred, because they can easily be held steady, are conveniently handled and

carried, offer high image brightness. For extreme long range use, glasses of 8 and 9 power are recommended.

*However, all Zephyr-Light models offer new lightness, new ease of handling, because of their reduced weight.

All Bausch & Lomb Binoculars Are Balcote Anti-reflection Treated.

MONOCULAR

7X,35

True Zephyr-Light quality. Recommended where weight and price are prime considerations. For spectator sports, bird watching, motoring, etc.
61-16-22 In leather case, with strap
\$77.50
