

THE UNRIVALLED NIGHT GLASS

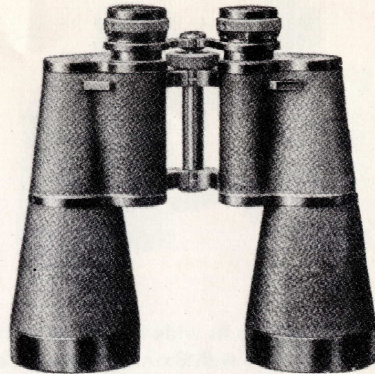

10x60

DECIMAR

separate eye-piece focusing

DECIMARIT

central wheel focusing

This special model offers the best combination of magnification and size of exit pupil, and besides its outstanding general optical correction, it meets all physiological requirements for optimum observation possibilities in fading light down to complete darkness. Among all hand field glasses it thus possesses *the highest attainable efficiency in the dusk and darkness.*

The striking features of this high-power glass include the easily grasped shape and the surprisingly light weight.

For special requirements similar glasses are available with 12x and 15x magnification:

12x60 MARDOCE (separate eyepiece focusing)

MARDOXIT (central wheel focusing)

15x60 CAMPOFORT (separate eyepiece focusing)

CAMPOFORTIT (central wheel focusing)

Model and Codeword	Magnification	Diameter of Objectives mm	Diameter of Exit Pupil mm	Light-transmitting Power	Field of View in degrees	Field of View linear at 1000 yards	Weight without Case ozs.
Decimar	10x	60	6	36	5.8	102	42½

Mardoce	12x	60	5	25	4.3	75	42½
Mardoxit	12x	60	5	25	4.3	75	43
Campofort	15x	60	4	16	4.65	81	44
Campofortit	15x	60	4	16	4.64	81	45

THE STANDARD GLASS FOR THE HUNTER

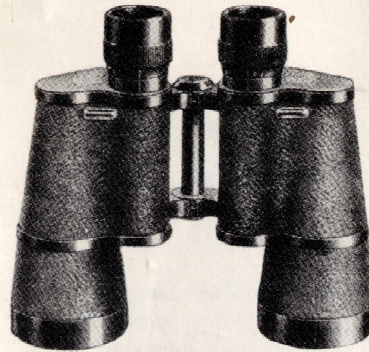

7x50

MARSEPT

separate eye-piece focusing

MARSEPTIT

central wheel focusing

MB

Unexcelled image quality, equally outstanding by day, in the dusk or darkness. The large exit pupil gives a maximum brilliance for the 7x magnification.

When observing from unsteady positions, or when following moving game the object can easily be kept in the field of view.

For special requirements similar glasses are available with 10x magnification and known as the models MARDIX (separate eyepiece focusing) and MARDIXIT (central wheel focusing).

Model and Codeword	Magnification	Diameter of Objectives mm	Diameter of Exit Pupil mm	Light-transmitting Power	Field of View in degrees	Field of View linear at 1000 yards	Weight without Case ozs.
Marsept	7x	50	7.14	51	7.3	128	33
Marseptit	7x	50	7.14	51	7.3	128	34
Mardix	10x	50	5	25	5	87.5	32½
Mardixit	10x	50	5	25	5	87.5	33½

PRISM BINOCULARS

For Sports, Hunting, Touring

E. LEITZ, NEW YORK

Leica #8187

E. LEITZ, NEW YORK

Leitz PRISM BINOCULARS

can again be supplied in the well-known quality and in a wide range of models from opera glasses to night hunting glasses. The present list shows a selection of those LEITZ glasses which are in greatest demand and which are designed for sport and travel, but above all for hunting; in all the models illustrated here particular consideration has been given to the desire for a higher luminosity and a larger field of view. Everywhere and at all times these high-grade LEITZ glasses afford a welcome, often unforgettable enhancing of the experience of holidays, racing and other events.

LEITZ PRECISION

has become world-famous during the course of its hundred years' tradition. Like LEITZ microscopes, measuring instruments, or the universally known Leica Miniature Camera, the LEITZ prism glasses are also

World Famous Products
of Ernst Leitz, Wetzlar, Germany

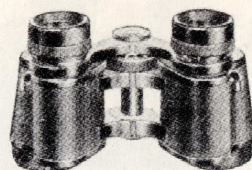

In all LEITZ glasses lens and prism surfaces are improved by an anti-reflection coating. By this means the effective light transmitting power is increased, every disturbing reflection precluded, and an increased brilliance of the image is achieved. This improvement is of particularly impressive effect in the twilight and with unfavorably illuminated objects.
