FIRST GRADE BINOCULARS

**PRICED
LOW!**

Made with Coated Lenses that tend to reduce reflections and pass up to 50% more light than uncoated lens. **FULLY GUARANTEED.** Each binocular is clamped in (not just glued!) prisms—light weight alloy all metal bodies — weather proof — tear proof outer coverings — maximum light transmission — minimum distortion. Made by leading optical manufacturers.

FOCUS — mechanism is either central focus (C.F.) by means of single wheel and one adjustable eye piece or individual focus (I.F.) wherein both eye pieces are separately adjustable.

POWER — number of times an image is magnified through binoculars. For example 7X (7 power) means the object will appear 7 times larger (or closer).
