

Feature for feature, price for price,
it's probably the finest camera
ever made in Japan.

The Minolta SR-T Super has every feature necessary to the success of the accomplished photographer. Including exclusives like a foolproof through-the-lens exposure system and control-integrated viewfinder. No other SLR handles easier or faster. Or gives you a range of film speeds from ASA 6 to 6400. Or lets you load a roll of film in seconds. Consider also that 120 Minolta Rokkor Lenses and accessories can be used with the SR-T Super and you'll have a good idea why we're confident enough to compare it with any SLR camera made today. Feature for feature. Price for price.
