FANTASTIC 35 x 60

'CROSS CHANNEL' PRISMATICS

by LIEBERMAN & GORTZ

Imagine the power of an Astral Telescope held easily in your hands—We say the greatest Binocular on earth—at about one-third the price of its nearest competitor! Now DISTANCE DOES NOT MATTER. 35 magnification! Unbelievable, but true, AND extra lightweight. For Sports, Holidays, even the Planets. 10-year guarantee. ENTER A MAGIC NEW WORLD OF VIEWING—*Bridge the Channel! *Study the craters on the Moon, or the Day and Night skies! *Take a trip round the ocean without moving! *Follow the Sputniks! Yes, and what's more they are also simply magnificent for shorter distances. A flick of the finger and you are actually there at the starting line—yes, you'll tell the Jockeys what happened! At cricket or other sports you are actually brought right on to the field of play. Superb definition and amazing clarity. Bloomed scientific lenses. Centre focus. Independent right eye-piece. Cash price only 25 gms. or 17/6 deposit, bal. by 18 fortnightly payments of 33/4. Refund Guarantee. Case sent on approx. 32/6 extra. REMEMBER YOU MUST HAVE A 35 x 60. It stands to reason that lesser magnifications just cannot give such performance. When others put their glasses down yours are still in use.

LIEBERMAN & GORTZ BINOCULARS

Binoculars, once the proud possession of the rich, are now within the reach of everybody who has a desire to see the beauties of nature, the wonders of science, and the fantastic achievements of present day sportsmen at close range.

This catalogue is presented to you as a complete guide to your own particular needs, whether you are a bird watcher, marine enthusiast, stargazer, hunter, sports spectator, racing fan or just a chap who wants a pair of glasses to carry around with him to use at will. For any or all of these needs the **Lieberman & Gortz** ranges herein displayed contain your own personal model.

The tendency in Binocular manufacture these days is for high power, wide field of view and light weight and without sacrificing quality of construction. We claim that every **Lieberman & Gortz** model has these three qualities as standard equipment, and in this respect the manufacturers of **Lieberman & Gortz** Binoculars were the first to introduce the very high power lightweight models, see our illustrations of 35 x 60, 25 x 52, 20 x 40, 16 x 50, etc.

There were of course construction snags, for instance the tendency of a high power to reduce the field of view, hand tremor which is always apparent in a high power glass and the smaller exit pupil lens which could cause momentary loss of the object, but by patient research, constant rejection and new construction methods these new models were put to the public minus hand tremor, with the widest possible field of view and large optics to conserve the light, the coated lenses complete the make up of a perfect Binocular—whichever model you choose.

A Binocular is two monoculars, joined together by two adjustable bending bars and having at the centre a focussing spindle—in the case of the centre wheel focus glass—and in the independent focussing models, a spindle to which the top and bottom bending bars are attached. Both these monoculars are adjusted for parallelism and stereoscopically aligned so that the two images merge into one, the bending bars are for adjustment to

correct eye width, the centre wheel focus is for correct focus on the left eye, the right eye is focussed by rotation of the right eyepiece.

In the independent models, each eye is focused by rotation of the eyepiece and the bending bars adjusted to correct eye width and on every part of the glass that is adjustable, there are calibrations so that you may register your mark for correct eye width, and correct focusing.

Binoculars are ordinarily described by two numbers separated by an "x" (which is read as "by") and of these two numbers, the first denotes the magnification and the second the effective clearance of the object lens diameter in millimetres, thus a 10 x 40 magnifies 10 times and has a 40 millimetre object lens, and 8 x 25 magnifies 8 times and has a 25 millimetre object lens and so on, it follows quite logically that a 40 millimetre object lens lets in more light to the glass than a 25 millimetre object lens and produces a wider field of view—remember this when making your selection.

Bloomed or Coated lens have the effect of minimising the loss of light caused normally through reflection in the transmission of light through the glass, in simple language the light has to turn a lot of corners and at each turn, when the light passes from one prism to another, loss of brightness occurs through reflection of the light rays and this could total up to a 40% loss but with the dull surface created by blooming, it is estimated that 85% of the brightness entering the glass reaches the viewer's eyes and creates a sharper and brighter image.

The choice of a Binocular depends entirely on your particular hobby, and you should seriously consider the following points before making your final choice.

High power glasses have a correspondingly smaller Exit Pupil and this is estimated in the following manner; divide the magnification figure into the object lens figure, thus a 20 x 40 glass has a 2 millimetre exit pupil, 8 x 25 has a 3.125 millimetre exit pupil, and a 10 x 40 has a 4 millimetre exit pupil. This should also be considered when choosing a glass to suit your particular needs.

HEADQUARTER & GENERAL SUPPLIES LIMITED

Directors: J. Collins, E. Joel

196-200 Coldharbour Lane, Loughborough Junction, London, S.E.5

Your order by post will be handled by our experts

This catalogue contains a comprehensive selection of the World Famous **Lieberman & Gortz** Binoculars, Field Glasses, Telescopes and Cameras, and also

a wide choice of Glasses by Zeiss, Leitz, Hartmann, Krombach, etc., etc.

Many of the individual offers of Binoculars in this Catalogue were used by High Ranking Officers of the Army, Navy and Air Force.

The new stock comprises every conceivable type of Binocular, with magnifications and diameter object lenses for all uses. A full allowance on any previous purchases of Binoculars and Telescopes can be arranged. Callers may inspect our stocks or you can post your order with confidence.

We still supply leading Government Control Departments, and Crown Agents for the Colonies.

★

IMPORTANT

The millimeter object measurements following the magnification of all Binoculars relates to the inside diameter of the actual lenses. Infinitesimal variations of diameters and magnification are always possible to a negligible degree.

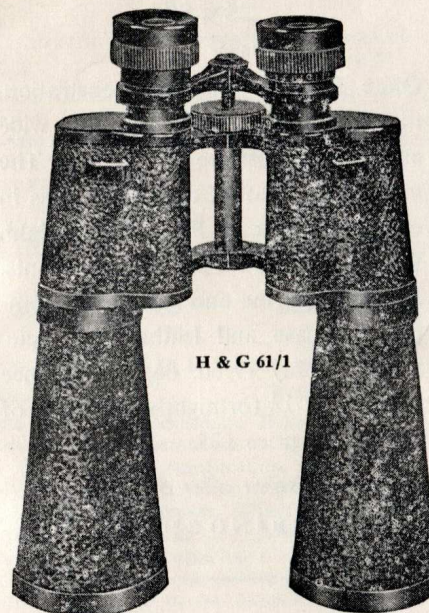

★

MAINTENANCE SERVICE

All Binoculars and Telescopes are cleaned or serviced without extra charge for a period of three years, inclusive in the prices shown.

★

In the event of a specific item being out of stock, we will send the nearest available on approval.

MB

x 60 means a wider field for those who require that EXTRA field when viewing. You cannot do better than buy a pair of our special Lieberman & Gortz x60 wide angle Binoculars.

ZEISS "BATTLESHIP" MODEL 7 x 50
35/- dep. and 18 fortnightly payments of 35/-
Regd. Post 3/-.

This Binocular is unique in its construction and performance, and for marine enthusiasts it cannot be excelled, magnifying 7 times with an O.G. lens of 50mm. It has fixed focus—always in focus—and the bending bars have micrometer adjustment for eyewidth. Eyecups are rubber capped to ensure exclusion of distracting light. All lenses and prisms are coated, making total reception of a crystal clear image a certainty. Colour filter is embodied to make viewing easier in all conditions. This Binocular is the type that was used on the bridge of all German Naval craft during both World Wars. Also **ROSS 5 x 40 Fixed Focus Model £18/19/6.** 25/- deposit and 18 fortnightly payments of £12.8 Regd. Post 3/-.

 10 x 50
 The famous German Hensoldt Dienstglas issued as war equipment to all captains in the German Navy. Independent focus, 50mm. object lens, large optics, registered bending bar. This glass has proved its sturdy qualities during the war and has been taken into active use by sportsmen everywhere. It provides a steady image without distortion and is lightweight. For all-round use this glass has no peer and the small quantity available makes early application essential. Complete in leather case with lanyard and sling.

H & G 61/36

£16.16.0

 8 x 30. Regd. Post 3/-
 By Lieberman & Gortz. These glasses are individually manufactured, consequently they are mathematically true and perfectly poised, having a wide field of view with perfect clarity and very deep penetration. Bending bar for eye adjustment, centre screw focusing with independent eyepiece focusing. A popular 8 x 30 magnification. These glasses are assured to give you satisfaction. Complete with case and sling.

H & G 61/41 THE FAMOUS

ZEITZAL MILITAIRE MARK 50

H & G 61/41 £38.10.0

59/6 deposit and 18 fortnightly payments of 40/6
 Regd. Post 3/-
 This model is undoubtedly the Rolls-Royce of all Binoculars, has every conceivable modern improvement. The large field of view is capable of an enormous angle, and over a distance of 12 miles right and left of each object lens by careful manipulation of centre focus and eyepiece. The field of view can be condensed for Sports, Racing, closely detecting colours in a big field of Horse Racing. In our opinion there is no glass in existence that can better the performance of these glasses. The ocular lenses are the correct size to counteract any fractional blackout under all conditions.

As Used by Camera-men the World Over.

At Last! A really Powerful Astronomical Telescope for as little as £11.19.6

up to 78x

The table mounting is comfortable to use and eliminates shake. You need a good steady base for star-gazing, and this instrument has it.

You will see the craters on the moon, planets that look as big as a sixpence, the rings of Saturn, thousands of stars invisible to the naked eye.

This astronomical telescope by Lieberman & Gortz magnifies up to 78 times. Modelled on the latest system used by the giant Mount Palomar Observatory it uses a brilliant four-inch reflecting lens of fantastic light gathering power. This is the real thing, and will give astronomy enthusiasts the thrill of using a tip-top instrument never before available at this price.

The telescope is available with eyepieces giving magnifications of 31, 46 and 78. This range is sufficient for all purposes.

With 31 magnification **£11.19.6**

H & G BOAT COMPASS 55/-

Postage and Packing 2/6.

Now you can really navigate in comfort. This compass is specially designed for small and medium size boats, cabin cruisers, yachts, etc. Beautifully made, it is the "ball" type with black and gold finish and red steering line. The disc is luminous, painted black, floating in liquid on a jewelled pivot. The dial, graduated in 5° units, is easy to read as it is made so that your direction is always faced towards you. The bracket of black anodized aluminium, gives full gimbal action. Technically the very latest improvements have gone into this. The HC Barium Ferrite magnet has the greatest possible resistance to deviation. This is a precision instrument, worth much more. Limited Stocks.

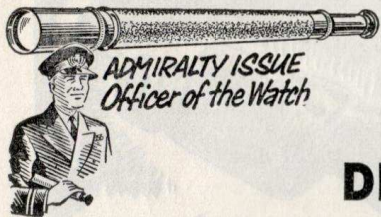

H & G CAR COMPASS 55/-

Postage and Packing 2/6.

This is a Car Compass, but with a difference. This is a de-luxe model with a high-grade performance and superb finish that you can genuinely be proud of. The compass is of the "ball" type, the upper part of glossy transparent acrylic, the lower heavily chromed, and a red driving line. The disc, floating in liquid on a jewelled pivot, is marked in 5° units, and is easy to read as your direction is shown always facing you. The compass is mounted on a chrome bracket, linked with a universal joint which can be instantly adjusted in any direction. The bracket can be screwed on the fascia panel or any adjacent part. Wherever it is mounted the universal joint makes it easily adjustable for the driver to read in comfort.

ADMIRALTY RELEASE FOR THE 1961 SEASON

200 ONLY

GENUINE Naval Officers' POWERFUL DRAW TELESCOPES

plus 2/6 p. & p. Or sent for £1 deposit, balance by 18 fortnightly payments of 6/2

12 x 60 approx. These powerful instruments were made for the U.S. Navy by Bausch & Lomb. Light in weight for a Naval Sight. Tremendous range with wide field of view. Released to us by the Admiralty, but unfortunately unrepeatable.

Also available with additional right angle eyepiece for two-man viewing at 20/- extra.

MINISTRY RELEASE—SEND QUICKLY

500 only—just arrived from a big surplus deal via our stores in Germany. We were the successful bidders in this tender and we have much pleasure in offering this instrument that will give you hours of enjoyment for only 27/6 plus 2/6 pack and postage. Although it will fit in handbag or pocket with ease the clarity and field of view is quite remarkable. Adjustable eye focus. Cost many pounds to make. Steady magnification.

Fantastic 35 x 60 "CROSS CHANNEL" PRISMATICS

by LIEBERMANN & GORTZ

Imagine the power of an Astral Telescope held easily in your hands—We say the greatest Binocular on earth—at about one-third the price of its nearest competitor! Now DISTANCE DOES NOT MATTER. 35 magnification! Unbelievable, but true, AND extra lightweight. For Sports, Holidays, even the planets. 10-year guarantee. ENTER A MAGIC NEW WORLD OF VIEWING—*Bridge the channel! *Study the craters on the Moon, or the Day and Night skies! *Take a trip round the ocean without moving! *Follow the Sputniks! Yes, and what's more they are also simply magnificent for shorter distances. A flick of the finger and you are actually there at the starting line—yes, you'll tell the Jockeys what happened! At cricket or other sports you are actually brought right on to the field of play. Superb definition and amazing clarity. Bloomed scientific lenses. Centre focus. Independent right eye-piece. Cash price only 25 gns. or 17/6 deposit, bal. by 18 fortnightly payments of 33/4 Refund Guarantee Case sent on approx. 32/6 extra. REMEMBER YOU MUST HAVE A 35 x 60. It stands for reason that lesser magnifications just cannot give such performance. When others put their glasses down yours are still in use.

H & G 61/41 THE FAMOUS

ZEITZAL MILITAIRE MARK 50

59/6 deposit and 18 fortnightly payments of 40/6
 Regd. Post 3/-

This model is undoubtedly the Rolls-Royce of all Binoculars, has every conceivable modern improvement. The large field of view is capable of an enormous angle, and over a distance of 12 miles right and left of each object lens by careful manipulation of centre focus and eyepiece. The field of view can be condensed for Sports, Racing, closely detecting colours in a big field of Horse Racing. In our opinion there is no glass in existence that can better the performance of these glasses. The ocular lenses are the correct size to counteract any fractional blackout under all conditions.
