Three outstanding features of the new CARL ZEISS binoculars:

- **Increased marginal sharpness** . . . through the use of 6-lens oculars.
- **Reduced overall dimensions** . . . With tele-objectives, Zeiss binoculars are smaller, lightweight than other binoculars of like capacity.
- **Optical design** . . . For use **with or without** eyeglasses, there are the special "B" models: 7x50B, 8x30B, 8x50B.
